

This workforce solution was funded by a grant awarded under Workforce Innovation in Regional Economic Development (WIRED) as implemented by the U.S. Department of Labor's Employment and Training Administration. The solution was created by the grantee and does not necessarily reflect the official position of the U.S. Department of Labor. The Department of Labor makes no guarantees, warranties, or assurances of any kind, express or implied, with respect to such information, including any information on linked sites and including, but not limited to, accuracy of the information or its completeness, timeliness, usefulness, adequacy, continued availability, or ownership. This solution is copyrighted by the institution that created it. Internal use by an organization and/or personal use by an individual for non-commercial purposes is permissible. All other uses require the prior authorization of the copyright owner.

SPACE: YOUR CAREER JUST LAUNCHED

California and the nation will experience up to a 50% decline in the aerospace workforce due to high retirement rates. The average starting salary for an aerospace-related career is \$55,000 a year with generous benefits. Now is the time to follow your dreams by joining in on the vision and future of America's space program. Visit your campus advisor today and find out how you can tailor your studies to find yourself in one of the hundreds of positions waiting for you in California's space industry.
